

MULTIPLIER EVENT

EGE UNIVERSITY

February 17th 2017

Multiplier event activity of EPBC was held on 17th February, 2017 in Portobello Hotel, Antalya. Totally 62 outer participants besides EPBC members, representing national and international seed companies, universities, contributed to the event.

In the opening session, Prof. Dr. Hulya ILBI presented the European Plant Breeding College and the breeding master programme at Ege University, then opening speeches were done by Dr. Vehbi Eser, president of Turkish Breeder Union and Kamil Yılmaz, president of the Turkish Seed Association, and Dr. Abdullah Ünlü, director of the West-Mediterranean Research Institute of Ministry of Agriculture, respectively.

After opening ceremony, the EPBC students who attended ISP at Ege University, presented their breeding projects as being involved in 3 groups.

In the event, the panel on “Future Challenges for Plant Breeders” was performed. In this panel, Dr. Vehbi Eser summarised the breeding history in Turkey, mentioned that the first breeding activities initiated mainly for cereals in the Research Stations of Ministry of Agriculture and State Universities, then since 2004, national seed companies have started the breeding programme especially for vegetable crops. Zekai Ilter, the director of the EZ Seed Company, emphasised that breeders must be aware of the market demands and must focus on climate changes, pathogen resistance considering new races and genes in the breeding projects. Prof. Dr. Bülent Uzun and Prof. Dr. Taner Akar, from Akdeniz University, mentioned the role of the universities in the education of future breeders, emphasised the need for new master programmes specialised on breeding, importance of collaboration between the university and seed sector, explained the Turkish government supports for collaborative researches between seed firm and university on breeding and shared their achievement experiences.
